Experiences

May 2024 - Present

Freelance Web Developer
PT. Tumpang Sari Doa

- Developed a company profile website for a guest house and women's boarding house business, showcasing detailed descriptions of facilities and rooms.
- Handled full-stack development including front-end using Bootstrap and back-end admin features with Laravel and Livewire.
- Solely responsible for the website's development, maintenance, and updates, managing the entire project independently.

February 2022 - August 2022

IT Support Intern
PT. Morita Tjokro Gearindo

- Provided IT support, resolving employee computer issues to maintain office infrastructure.
- Built server hardware, including data recovery servers, to meet business needs.
- Managed business data, processing tax information and server datasets using Microsoft Excel.

Projects

January 2025

Writely– Multi-User Blogging Platform
Laravel, Bootstrap, HTML, CSS, JQuery

- Built a multi-user blog with real-time interactive features (likes, comments, messaging) using Laravel 11.
- Developed user profile and content management (edit, delete, categorize, follow).
- Designed a responsive frontend for seamless cross-device experience.

November 2024

POS System for Laundry Administration
HTML, CSS, jQuery, PHP

- Developed web-based POS for laundry with full CRUD, auto-calculation, and receipt printing.
- Enabled real-time transactions using AJAX.
- Built responsive UI (HTML, Bootstrap, jQuery); used PHP & MySQL on XAMPP server.
